Master Thesis

presented by

Viktor Shcherbakov

Machine Learning Group

Supervisor:
Prof. François Fleuret

Geneva, February 7, 2026

To my family and friends.

Acknowledgments

I would like to express my sincere gratitude to my supervisor, Prof. François Fleuret, for his guidance, patience, and unwavering support throughout this project. His willingness to engage in open discussions and his flexibility during the many shifts in research direction were invaluable to the completion of this work.

I am equally grateful to Prof. Martin Jaggi for hosting me at the Machine Learning and Optimization (MLO) laboratory at EPFL during my academic exchange. His insightful discussions and constructive feedback significantly shaped the direction of this thesis. I also wish to thank the members of the MLO lab for the productive discussions following my presentation of this work, which helped refine many of the ideas presented here.

The supportive and collaborative environment provided by both professors made navigating the challenges of this research a rewarding experience. *Geneva, February 7, 2026* Viktor Shcherbakov

Abstract

[Write your abstract here. The abstract should provide a concise summary of your thesis, including the problem addressed, the methodology used, the main results, and the conclusions drawn.]

Résumé

[Ecrivez votre resume ici. Le resume doit fournir un apercu concis de votre these, incluant le probleme aborde, la methodologie utilisee, les resultats principaux et les conclusions tirees.]

Chapter 1

Introduction

1.1 Context and Motivation

1.2 Problem Statement

1.3 Research Questions

1.4 Contributions

1.5 Thesis Outline

The remainder of this thesis is organized as follows:

Chapter 2 presents the theoretical background and foundational concepts necessary to understand this work.

Chapter 3 reviews related work and positions this thesis within the existing literature.

Chapter 4 describes the proposed methodology and approach.

Chapter 5 details the experimental setup and evaluation protocol.

Chapter 6 presents the experimental results.

Chapter 7 discusses the findings, limitations, and implications.

Chapter 8 concludes the thesis and suggests directions for future work.

Chapter 2

Background

2.1 Theoretical Foundations

2.2 Key Concepts

2.3 Technical Preliminaries

2.4 Summary

Chapter 3

Related Work

3.1 Overview

3.2 Category 1

3.3 Category 2

3.4 Comparison with This Work

3.5 Summary

Chapter 4

Methodology

4.1 Overview

4.2 Problem Formulation

4.3 Proposed Approach

4.3.1 Component 1

4.3.2 Component 2

4.4 Implementation Details

4.5 Summary

Chapter 5

Experiments

5.1 Experimental Setup

5.1.1 Datasets

5.1.2 Baselines

5.1.3 Evaluation Metrics

5.2 Implementation Details

5.2.1 Hardware and Software

5.2.2 Hyperparameters

5.3 Evaluation Protocol

5.4 Summary

Chapter 6

Results

6.1 Main Results

6.2 Comparison with Baselines

6.3 Ablation Studies

6.4 Qualitative Analysis

6.5 Summary

Chapter 7

Discussion

7.1 Interpretation of Results

7.2 Limitations

7.3 Broader Implications

7.4 Summary

Chapter 8

Conclusion

8.1 Summary of Contributions

8.2 Future Work

8.3 Concluding Remarks

Appendix A

Supplementary Material

A.1 Additional Experimental Results

A.2 Proofs

A.3 Implementation Details
